The Vanderbilt LVES Course
STROBOSCOPY PERFORMANCE WITH INTERPRETATION
OCTOBER 5-6, 2018
NASHVILLE, TN
With Optional Course October 7
3rd Annual Vanderbilt Voice Therapy Intensive

COURSE DESCRIPTION
The Vanderbilt LVES Course is designated as a tutorial for Speech-Language Pathologists and Otolaryngologists to cultivate their understanding and performance of the laryngeal videostroboscopy (LVES) exam. Principles of laryngeal function will be discussed so that the clinician will understand the diagnostic potential of stroboscopy. Several hours of hands-on sessions will develop skills in the clinical performance of both rigid and flexible endoscopy. Interpretation of stroboscopic parameters and perceptual analysis will be presented through didactic lectures and applied during instruction. This is not a CME-accredited course. ASHA CEU’s only.

EDUCATIONAL OBJECTIVES
After participating in this CE activity, participants should be able to:
• Demonstrate the technique of performing LVES
• List the components of a comprehensive LVES exam
• Demonstrate emerging hands-on skill with rigid and flexible endoscopy
• Describe the interpretation of an LVES exam and subsequent management recommendations

FACULTY DISCLOSURES
It is the policy of Vanderbilt University School of Medicine that the information presented at Vanderbilt CE activities will be unbiased and based on scientific evidence. To help participants make judgments about the presence of bias, disclosure of financial relationships of speakers and Vanderbilt with commercial entities that produce or market products or services related to the content of the CE activity, if any, will be made known to the audience at the beginning of the course. In addition, off-label uses will be identified when mentioned.

VANDERBILT COURSE FACULTY
