FAqs: What you need to earn your badge at . . .

Hands on Clinical Safety

Thursday, April 12 & Friday, April 13
Langford Auditorium Lobby
7am to 6pm; check in ends at 5pm

Employee ID badge or social security number necessary for registration.

Mock Code:
Defib/AED, Airway Management & Blood Administration
Required for licensed direct care staff every other year unless...
- ACLS/PALS/ATLS is current or
- Within the past 24 months, completion of:
  Essentials of Resuscitation (EOR) or Advanced Airway course for physicians or nurses
  or Clinical Orientation or training in your own department

Blood Administration consists of:
Mock transfusion practice/return demonstration in a simulated setting and review of documentation for those who need blood transfusion only. Offered at the end of mock code.
Required annually for licensed staff who administer blood or blood products.

N-95 Fit-Testing provided by VEHS.
Required annually for staff who provide care for patients on airborne precautions as listed in Departments Required to have Annual N-95 Respirator Fit-testing.
For more information, visit the VEHS N-95 Respirator Program page:
https://www.vumc.org/safety

Restraint Competency is a biennial requirement offered on even years regardless of year hired.
Required for staff who initiate, monitor and/or remove a restraint or any staff providing direct care for a patient in a restraint.

Occupational Health Clinic “Compliance Quickies”

Please note:
- Annual point-of-care proficiency testing is not offered at Hands On: Clinical Safety.
- Non-clinical annual requirements are only offered online; computers available at Hands On: Clinical Safety to complete requirements.
