POLICY FOR IDENTIFICATION OF MECHANIC AVAILABILITY

Purpose: To establish a log of available mechanics during call in, weekend and shift coverage.

Policy: At the beginning of each shift, upon arrival for call in situations or for overtime work, each mechanic will call the Delta and advise the operator of availability. Prior to leaving the facility, those mechanics on overtime or call in will advise the Delta operator they are no longer available. This covers all occasions except for regularly scheduled day shifts Monday through Friday. Mechanics assigned “building call” on day shifts will establish radio contact with the Delta operator identifying themselves and the buildings they are covering at the beginning of each day. The Delta Operators will maintain a daily log of mechanics available along with the communication mode, i.e., 2-way or beeper number.
