POLICY ON CONFINED SPACE ENTRY

Purpose: Accidents in confined spaces have resulted in severe debilitation and death. The purpose of this policy is to insure adequate consideration is given to confined space safety precautions in accordance with applicable regulations.

Policy: Confined space entry practices and procedures outlined in the Safety Manual, Section 7 are to be complied with in the identification of confined space and the entry of staff into confined space.

Responsibility: It is the responsibility of each mechanic to be familiar with the definitions and identification of confined spaces. It is the responsibility of all Management Staff to monitor work and insure compliance with the safety precautions identified in the Safety Manual. Failure to follow confined space safety precautions is considered a serious safety violation which could result in the injury of staff.
