- Become familiar with Medilinks and actively participate in documentation for in-vehicle assessment
- Weekly meeting with FE

WEEK 2
- Observe and participate in sessions with all designated patients with FE
- Observe at least one patient in the Seating and Mobility Clinic
- Interact/communicate with interdisciplinary team as appropriate
- Actively participate in administering assessments from last week as well as vision assessments (Optec 3500, Dynavision, Vision Coach, etc)
- Document in-clinic assessments with assistance from FE
- Become familiar with Driver Rehabilitation Car
- Demonstrate an understanding of when and how to use adaptive aids in driver rehabilitation: blind spot mirrors, wide angle mirrors, pivoting transfer seats, HandyBar, etc
- Contribute to weekly meeting with FE

WEEK 3
- Observe and participate in sessions with all designated patients with FE
- Interact/communicate with interdisciplinary team as appropriate
o Actively participate in administering assessments from weeks 1 and 2 as well as cognitive assessments (MOCA, SBT, Maze Task, etc)
o Document in-clinic assessments with assistance from FE
o Demonstrate an understanding of when and how to use adaptive driving equipment in the car including steering devices, left foot accelerator, left-side hand controls, and accelerator-brake guard
o Contribute to weekly meeting with FE

WEEK 4
o Observe and participate in sessions with all designated patients with FE
o Interact/communicate with interdisciplinary team as appropriate
o Actively lead in-clinic assessments, including initial interview
o Document in-clinic assessments with assistance from FE
o Participate in in-vehicle assessment documentation
o Demonstrate an understanding of when and how to use adaptive driving equipment in the car including right-side hand controls
o Demonstrate an understanding of necessary points of communication within driver rehab process with patients/families, physicians, vendors, funding sources, and regulatory bodies, such as the TN Dept. of Safety
o Begin discussion about in-service topic/project
o Contribute to weekly meeting with FE

WEEK 5
o Observe and participate in sessions with all designated patients with FE
o Interact/communicate with interdisciplinary team as appropriate
o Document in-clinic assessments with assistance from FE
o Lead in-vehicle assessments until point of debriefing with minimal assistance from FE as unique situations arise
o Document in-vehicle assessments with assistance from FE
o Become familiar with Driver Rehab Minivan and ingress/egress features
o Finalize in-service/project topic and schedule it
o Contribute to weekly meeting with FE

WEEK 6
o Observe and participate in sessions with all designated patients with FE
o Interact/communicate with interdisciplinary team as appropriate
o Document in-clinic assessments with little to no assistance from FE
o Document in-vehicle assessments with minimal assistance from FE
Demonstrate an understanding of when and how to use adaptive
driving equipment in the minivan, including right-side push pull hand
control with a tripin, tripin steering device and reduced effort
steering.

- Work on in-service/project topic
- Participate in mid-term evaluation

**WEEK 7**
- Observe and participate in sessions with all designated patients with FE
- Interact/communicate with interdisciplinary team as appropriate
- Complete in-vehicle assessments including preparation, documentation, direct evaluation, with patient and presentation of recommendations at the end of the session with minimal assistance from FE as unique situations arise
- Become familiar with writing equipment prescriptions
- Work on in-service/project topic
- Participate in a vendor visit
- Contribute to weekly meeting with FE

**WEEK 8**
- Observe and participate in sessions with all designated patients with FE
- Interact/communicate with interdisciplinary team as appropriate
- Complete all aspects of in-clinic assessments including preparation, documentation, direct evaluation, with patient and presentation of recommendations at the end of the session with minimal assistance from FE as unique situations arise
- Complete in-vehicle assessments and training with minimal assistance from FE as unique situations arise
- Practice “take over” techniques in the vehicle with FE
- Contribute to writing equipment prescriptions
- Work on in-service/project topic
- Observe in other areas of hospital/clinic as time allows
- Weekly meeting with FE

**WEEKS 9-10**
- Observe and participate in sessions with all designated patients with FE
- Interact/communicate with interdisciplinary team as appropriate
- Complete all aspects of in-clinic assessments with minimal assistance from FE as unique situations arise
o Complete in-vehicle assessments through the point of debriefing and making recommendations with minimal assistance from FE as unique situations arise
o Complete in-vehicle assessments and training with minimal assistance from FE as unique situations arise
o Contribute to writing equipment prescriptions
o With FE’s supervision, teach a fellow student to drive with specified adaptive equipment in a training parking lot
o Work on in-service/project topic
o Observe in other areas of hospital/clinic as time allows
o Weekly meeting with FE

WEEK 11
o Observe and participate in sessions with all designated patients with FE
o Interact/communicate with interdisciplinary team as appropriate
o Complete all aspects of in-clinic assessments with minimal assistance from FE as unique situations arise
o Complete in-vehicle assessments and training with minimal assistance from FE as unique situations arise
o Contribute to writing equipment prescriptions
o Observe in other areas of hospital/clinic as time allows
o Weekly meeting with FE
o Finalize in-service/project, review with FE, and present to clinic
o Complete student survey

WEEK 12
o Observe and participate in sessions with all designated patients with FE
o Interact/communicate with interdisciplinary team as appropriate
o Complete all aspects of in-clinic assessments with minimal assistance from FE as unique situations arise
o Complete in-vehicle assessments and training with minimal assistance from FE as unique situations arise
o Contribute to writing equipment prescriptions
o Complete self-evaluation (if mandated by program)
o Complete assessment of FW experience
o Complete final evaluation
o Demonstrate entry level OT skills for evaluation, treatment implementation and planning, communication, and professional behaviors for a driver rehab program
Please let the staff at PBP know if we can help you in the future. We enjoyed being a part of your educational experience!!!
