VANDERBILT TRANSPLANT CENTER

Presents the 14th Annual

VANDERBILT TRANSPLANT
NURSE PRACTITIONER SYMPOSIUM

OCTOBER 1-2, 2018
HILTON NASHVILLE DOWNTOWN

Vanderbilt Transplant Center has long been recognized as one of the nation’s premiere and largest centers in transplantation, averaging over 460 per year in adult and children’s liver, kidney, heart and lung transplants.

We are committed to providing patients compassionate and individualized care that combines state-of-the-art technology with extensive multidisciplinary experience. As part of a major research institution, we partner with our world-renowned researchers to provide our patients advanced therapies and resources, including access to rare clinical trials and technologies that improve safety and outcomes. Our mission is to provide end-stage organ failure patients an opportunity to lead an extraordinary life.

As the number of Nurse Practitioners caring for transplant patients continues to increase, their role focusing on acute/chronic illness with emphasis on preventative maintenance has become vital to the lifelong care of transplant patients and their unique needs. This conference is designed to address the complexities of managing the transplant patient within the scope of practice of the Nurse Practitioner. This year’s agenda will include topics in Infectious Risk Exposure, Diabetes, Medication Adherence, Hyperlipidemia HTN, Marijuana in Transplantation, Pharmacology Updates, as well as non-organ specific guidelines for assessment of transplant patients and diagnosis and treatment of common comorbidities and more.

**OVERVIEW**

As the number of Nurse Practitioners caring for transplant patients continues to increase, their role focusing on acute/chronic illness with emphasis on preventative maintenance has become vital to the lifelong care of transplant patients and their unique needs. This conference is designed to address the complexities of managing the transplant patient within the scope of practice of the Nurse Practitioner. This year’s agenda will include topics in Infectious Risk Exposure, Diabetes, Medication Adherence, Hyperlipidemia HTN, Marijuana in Transplantation, Pharmacology Updates, as well as non-organ specific guidelines for assessment of transplant patients and diagnosis and treatment of common comorbidities and more.
